

# Tesco Superstore, Sheringham, England. UK

Cost	Confidential
Status	Constructed
Participants	Tesco Stores Ltd. Smith Smalley Architects, Pinnacle, Consulting Engineers, Just Swiss Timber Construction Ltd R G Carter
Chapter	UK & Ireland, UK
buildingSMART	IFC

BIM allowed the team to combine the architect's and mechanical engineer's 3D models along with Pinnacle's own Tekla multi material model. The model provided a greater understanding of parametric relationships between disciplines, preventing co-ordination issues during the construction phase. **BIM technology allowed the client to view the complete model**, including internal aesthetics, in "real time" aiding decision making before construction commenced and provided a "live" shopping experience as well as giving an 'interactive' approach to internal Design Team reviews

“Pinnacle continue to pioneer BIM, whilst observing progress of the BIM Task Group. We are committed to embracing innovation in an increasingly competitive environment, supported by Tekla Structures, Autodesk Revit and 3D Civils, providing us with software flexibility to service differing project requirements.”
